

A CELLULAR PHONE ORNAMENT STRUCTURE

ABSTRACT

The present invention relates to a cellular phone ornament structure wherein cellular phones can be placed into different models. The present invention mainly consists of a cellular phone and an assembling stand. The cellular phone is not limited to firm brands or model types and length or size is based on size of a hand; the inner part of the assembling stand is in form of a box and consists of a group of elastic bands and several springs whereas the outer part is of one particular size and can be fitted into empty bodies of specially designed models. The present invention is thus a convenient way of changing phone ornaments according to one's personal taste and style.
